

RUN THE APPLICATION

Date	10/11/2022
Team ID	PNT2022TMID26023
Project Name	AI-powered Nutrition Analyzer for Fitness Enthusiasts
Maximum Marks	4 Marks

Run the application

- Open the anaconda prompt from the start menu.
- Navigate to the folder where your app.py resides.
- Now type the "python app.py" command.
- It will show the local host where your app is running on `http://127.0.0.1:5000/`
- Copy that localhost URL and open that URL in the browser. It does navigate to where you can view your web page.
- Enter the values, click on the predict button and see the result/prediction on the web page.

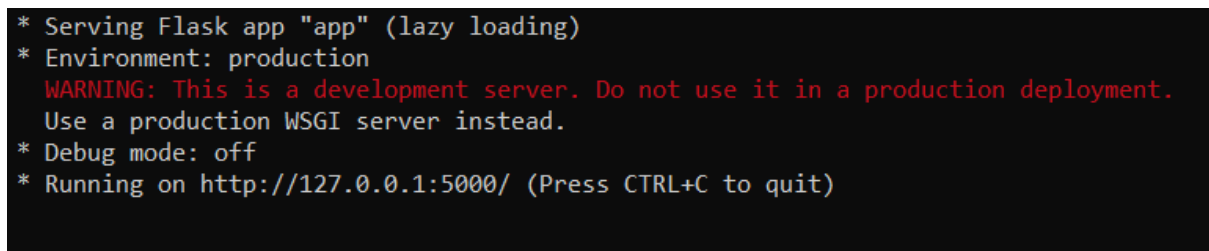

```
Anaconda Prompt (Anaconda3)

(base) C:\Users\Malan>cd C:\Users\Malan\Desktop\Flask

(base) C:\Users\Malan\Desktop\Flask>python app.py_
```

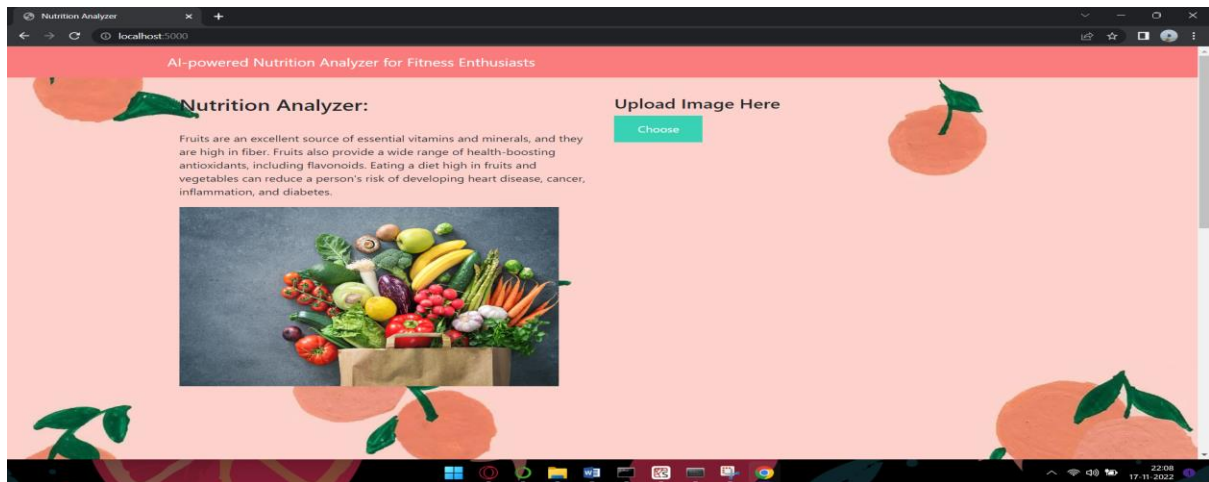

Then it will run on localhost:5000

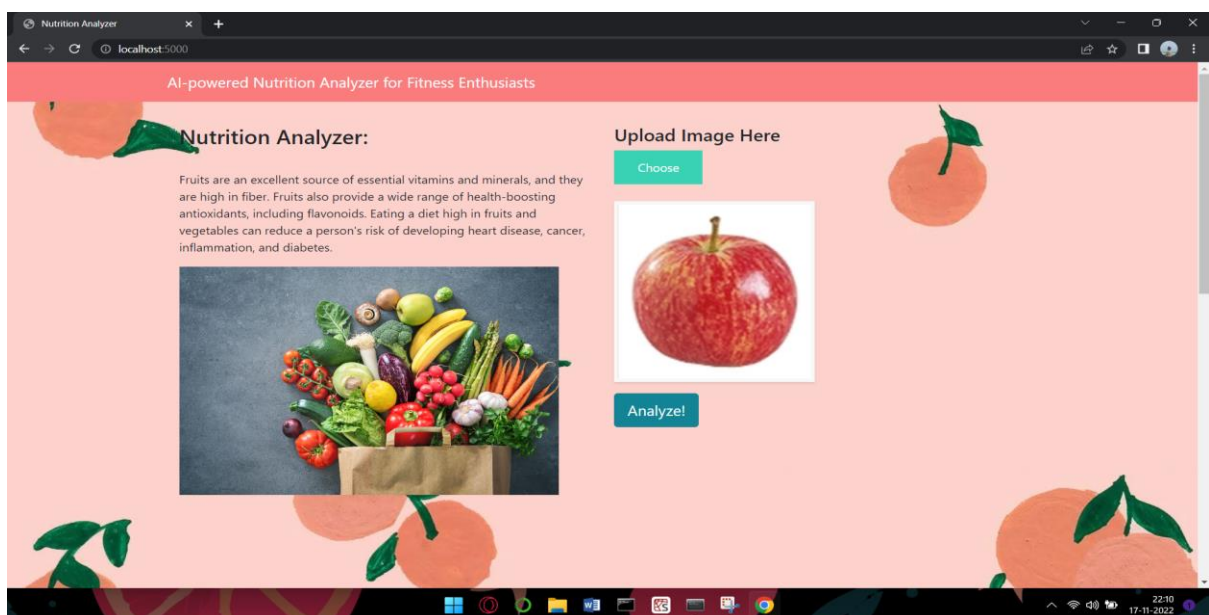

```
* Serving Flask app "app" (lazy loading)
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: off
* Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
```

Navigate to the localhost (`http://127.0.0.1:5000/`) where you can view your web page.
